

OBJECTIVES

Efficiently design, develop, and deploy feature-rich web applications using the MERN stack to meet business goals, enhance user experience, and drive growth. I aim to stay updated with the latest trends in web development, enabling me to deliver exceptional results and exceed expectations.

SKILLS

- **Expertise:** HTML, CSS3, Tailwind, DaisyUI, Bootstrap, React Bootstrap, React, React Router, JWT, ES6, Node js.
- **Comfortable:** MongoDB, Firebase Authentication, Express js, React Hook, Rest API.
- **Familiar:** Next.js, Axios, React Query.
- **Tools:** VS Code, Netlify, Firebase, GitHub, Vercel, npm.
- **Soft Skills:** Active Learner, Leadership, Hardworking.

PROJECTS

FluentRix

[GitHub Client](#)

[GitHub Server](#)

[Live Link](#)

- It is an online course platform where students can learn different types of languages with enrollment methods and have their dashboard to see enrolled classes, payment history also delete the class.
- There perform CRUD operations for all delete, update, post, and put methods.
- Also have admin and instructor dashboards to see the total classes, add classes, and all payments of students.

Technologies: React, Firebase, Express Js, MongoDB, DaisyUI, Tailwind, JWT, Axios, React Query.

ToyBiz

[GitHub Client](#)

[GitHub Server](#)

[Live Link](#)

- ToyBiz is an e-commerce single-page application where movie toys can sell and any user can add the toys in a cart.
- Perform Login system and Registration system and used a private route to add the toys to the cart only logged or registered users can add the toys.
- Sellers can add the toys and see their all added toys delete and update their toys.

Technologies: React, Firebase, Express Js, MongoDB, DaisyUI, Tailwind, JWT

Desi-Chefs-Recipes

[GitHub Client](#)

[GitHub Server](#)

[Live Link](#)

- Users can search different Bengali chefs' recipes and also the chefs' total recipes.
- When the user wants to see the recipe details user must have to log in or register to the site and the user can add their favorite item to the wishlist.
- Used Firebase login system where in the navbar after login the user name shows.

Technologies: React, Firebase, Express Js, React Bootstrap.

EDUCATION

B.Sc in Computer Science and Engineering,
Northern University of Business and Technology Khulna.

August 2019 - Present

ACHIEVEMENT

- **Machine Learning Course with Simplilearn**
- **Introduction To Ethical Hacking with Simplilearn**
