ARAFAT HOSSAIN

Junior Full Stack Engineer

Khulna, Bangladesh. +8801753157453 | arafathossainsat@gmail.com LinkedIn | GitHub | CodeForces | Portfolio

OBJECTIVES

Efficiently design, develop, and deploy feature-rich web applications using the MERN stack to meet business goals, enhance user experience, and drive growth with 1 years of development experience.

PROFESSIONAL EXPERIENCE

Junior Full Stack Engineer

ITech Soft Solutions - Khulna, Bangladesh

June 2024 - Present

- Developed and maintained the admin frontend for a SaaS product similar to Metricool, handling user authentication, data visualization, and management.
- Implemented features using React, Next.js, Node.js, and PostgreSQL, ensuring scalability and performance.
- Integrated GraphQL to streamline data fetching and improve frontend-backend communication.

Full Stack Engineer Intern

ITech Soft Solutions - Khulna, Bangladesh

December 2023 - May 2024

- Assisted in developing web applications using the MERN stack, focusing on both front-end and back-end components.
- Worked on implementing RESTful APIs and enhancing user interfaces with React and Tailwind CSS.
- Participated in team meetings, contributed to project planning, and followed Agile methodologies.

SKILLS

- Expertise: HTML, CSS3, Tailwind, DaisyUI, Bootstrap, React Bootstrap, React, React Router, JWT, ES6, Node js.
- Comfortable: MongoDB, Firebase Authentication, Express js, React Hook, Rest API.
- **Familiar:** Next.js, Axios, React Query.
- Tools: VS Code, Netlify, Firebase, GitHub, Vercel, npm.
- Soft Skills: Active Learner, Leadership, Hardworking.

PROJECTS

FluentRix GitHub Client GitHub Server Live Link

- It is an online course platform where students can learn different types of languages with enrollment methods and have their dashboard to see enrolled classes, payment history also delete the class.
- There perform CRUD operations for all delete, update, post, and put methods.
- Also have admin and instructor dashboards to see the total classes, add classes, and all payments of students.

Technologies: React, Firebase, Express Js, MongoDB, DaisyUI, Tailwind, JWT, Axios, React Query.

ToyBiz GitHub Client GitHub Server Live Link

- ToyBiz is an e-commerce single-page application where movie toys can sell and any user can add the toys in a cart.
- Perform Login system and Registration system and used a private route to add the toys to the cart only logged or registered users can add the toys.
- Sellers can add the toys and see their all added toys delete and update their toys.

Technologies: React, Firebase, Express Js, MongoDB, DaisyUI, Tailwind, JWT

EDUCATION

B.Sc in Computer Science and Engineering, NUBT Khulna.

2019 - 2023

ACHIEVEMENT

• Machine Learning Course with Simplilearn

Show Credential

• Introduction To Ethical Hacking with Simplilearn

Show Credential

• Champion in Inter-University Coding Contest
